

WASTEWATER UPDATE

June 1, 2018

Regional System

Phase 2 of the Southside Pigeon Lake Regional Wastewater Project has been tendered and work will commence this summer. This tie-in will provide service to Grandview, Poplar Bay and County of Wetaskiwin developments. Project completion is scheduled for late 2018 / early 2019 with commissioning in 2019.

The route for the pipeline is west along Hwy 13 to the Lakedell Road (R.R. 12), north along Lakedell road 1.5 km., west to Hwy 771 and then north to RR 14; the location of the new pump station.

Local Municipal Collection Systems

Individual service connections are well underway in Norris Beach, and just getting started in Crystal Springs and Ma-Me-O Beach.

The contract for Grandview and Poplar Bay Phase II of the system – that being the connections from the main line to individual holding tanks has been awarded to Urban Dirtworks Inc.

Work will begin in Grandview in June.

Poplar Bay residents will be contacted over the summer to plot out the locations of tanks and discuss any lot specific issues. Construction will start in Poplar Bay late in the fall. If you have not provided a contact number to the Summer Village Office, please send it with your cabin number to information@svofficepl.com .

PME is working on the completion of the Phase I project with pressure testing and restoration still outstanding.

Thank you for your patience as this project progresses.
