

Replacement Wastewater Holding Tanks

List of Certified and Suppliers in the Local Area

As part of the municipal wastewater upgrades in the Summer Village there is an inspection of existing sewage holding tanks for adequacy and conformance with the current standards as outlined in the Alberta Private Sewage Systems 2009 Standard of Practice (published by the Government of Alberta Safety Codes Council) and the Design Standards identified by MPE Engineering Ltd. For the new wastewater system.

Where existing tanks are identified as inadequate, it will be the responsibility of the homeowner to supply and install a tank that conforms to the requirement for the new system and Standard of Practice. A two compartment 2 riser chamber concrete tank with a storage capacity of 1200 gallons is required. There are additional requirements for insulation if the depth of bury from the ground surface to the top of the tank is less than 1.2 meters.

The tank must be installed by a Private Sewage Certified Contractor and that the necessary municipal development permits are applied for by that contractor. The contractor can provide assistance with solutions for the specific situation on your lot to meet the requirements of the Standard of Practice and the new wastewater system.

The following is a representative list of local **certified installers** for septic systems.

Baumann's Hoe & Bobcat	Alex Baumann	780-789-3843
Diamond A Excavating	Laine Anderson	780-312-4983
	Lorne Anderson	780-312-0355
Good Measure Services	Michael Hoflin	780-202-0032
Phil Crough & Son	Floyd Crough	780-387-6271
Warnke Drilling (2014) Ltd.	Shawn Tylke	780-361-8234
Xandal Backhoe	Alex Quast	403-782-1073

Following are a list of local **suppliers** of concrete wastewater holding tanks (note that his list is representative and not intended to represent all of the available suppliers).
