**SUMMER VILLAGE OF POPLAR BAY  
CONSTRUCTION NOTICE**

Dear Resident,

As part of the Summer Village of Poplar Bay's Low Pressure Wastewater Services project, underground wastewater connection services on your property are scheduled to be installed. Construction is scheduled to begin at the south end of the Summer Village early in January 2019 and move north with a completion date of September 30, 2019.

This construction process will include inspection of your holding tank, excavation along the roadway that leads to your residence, as well as at your holding tank location and the installation of the connecting pipe. Directional drilling will be used for pipe installation wherever feasible.

You will be contacted prior to any work being done on your property to finalize the details of service connections and locations.

Urban Dirtworks will make every reasonable effort to provide full time access to your residence during all hours of construction. Should access be limited, you will be made aware of it prior to construction beginning.

If you have small children, we ask that you please keep them at a safe distance from the construction zone and equipment. The construction crew on site will conduct all activities in a safe manner, however, they will need your assistance to constrain their natural curiosity.

Depending on weather, the hours of construction will be from 7am to 7pm Monday thru Friday and Saturday 7am to 6pm. In the rare case of an emergency situation, crews will work until the situation is resolved.

If necessary, you may contact Urban Dirtworks at 403-396-1062 (Mr. Cody Deschambault, Field Superintendent). In the rare event of an urgent matter, please call the Summer Village office (780-586-2494) or 911 in the event of an emergency.

Thank you for your patience during these interruptions and please be cautious around construction activities.

Yours truly,

Urban Dirtworks Inc.
