

## *Rx Capsule... "Summer/Fall" News From Your Royal Care Compounding Pharmacy*

As fall is not far off, we would like to shift your focus a little by letting you in on all the goodies coming up this fall at the drugstore. As part of our novel tradition, new and exciting things are happening at YOUR Royal Care Compounding Pharmacy.

**New POSITION AVAILABLE:** Here We Grow Again! So We now need another motivated team member to join us. The main duties of the new staff is to assist in the compounding room, coordinate our New Ideal Protein program (Coming up in the fall), the successful candidate may do marketing calls to local healthcare professionals and in no small measure help in other areas of need in the pharmacy. The position could be done on a part-time basis depending on availability.

This PT/FT position requires somebody with a great attitude, very comfortable with people, caring & compassionate. If this piques your interest, please come and talk to us at the pharmacy. Even if you have no experience and your attitude is right, we will help you learn the ropes!

### **Pharmacy Services Reminders...**

**FREE Injections** - Our pharmacy continues to provide you the opportunity of receiving your **FLU**, Immunization or B12 injections right here at the pharmacy at no cost to you. **Costs of administering Travel vaccines and Zostavax are sole responsibilities of the patient.**

**FREE Medication Review** - Drugs don't work well when we don't take them right!! How will that Herbal remedy, vitamin & other over the counter medications you just picked up help you and work in harmony with your prescription medications? Do you know what that "little yellow pill" does for you?

**FREE Smoking Cessation Help** - Calling all 'NON-Smoker Wannabees' Did you know that smoking is the number one preventable cause of death in Canada? Research shows that support from your pharmacist can double your chance of quitting. Come talk to us! We Treat you like family-because we are family too!

## How Would Compounding Help You?

Have you or a loved one ever had difficulty taking or tolerating certain medications? You're not alone. Many people experience issues such as the following:

- ❖ Stomach upset when taking certain oral medication.
- ❖ Reluctance to take the medication due to its taste.
- ❖ Difficulty swallowing pills.
- ❖ Requiring a different dose of medication than that which is available from a manufacturer.
- ❖ Patients who don't want to take medication at all, especially kids or pets.
- ❖ When the drug is not available from the manufacturer or sometimes it is altogether discontinued from public circulation.

A compounding pharmacist may be able to provide solutions for challenges such as these. Working closely with the patient and the prescriber, compounding gives the pharmacist the means to customize medication to meet the individual needs of each patient. Please free to stop by and talk to us about any compounding needs you may have. In the interim Feel free to visit our website [www.royalcarecompoundingpharmacy.com](http://www.royalcarecompoundingpharmacy.com) for more info.
