Update on Wastewater System, August 24, 2015

The Council of the Summer Village of Grandview is pleased to announce that the application for grant funding for our wastewater project under the Building Canada program has been successful. Under this program, two-thirds of the costs of our municipal system will be funded by the federal and provincial governments with the remaining coming from our Summer Village. This is truly good news for our residents!

Funding was also received by the other five municipalities on the south side of Pigeon Lake. Planning for final design and ultimately the construction of the local lines for those communities that will connect to the Westerosé pump station has commenced, with construction anticipated to commence in 2016. For Grandview, Poplar Bay, and some County developments, we are awaiting funding for the Phase 2 regional line before we can commence our construction. In this regard, we have advised the Province that the first phase of the regional line (Mulhurst Lagoon to the Village at Pigeon Lake) has been completed and we are ready to commence Phase 2. We hope to hear about this funding this year.

Further details on the design, operation, and governance for both the regional wastewater line and the local collection system will be provided in the near future. However, if any additional information is required, be sure to attend our “Meet and Greet” sessions, which are held each long weekend throughout the year, or contact one of your council members.

We appreciate the work of our Administration group for their diligence in obtaining this grant.
