

## **Notification of Test Pit Excavation**

**Issued April 28, 2016**

Further soils investigation will be completed in Ma-Me-O Beach and Norris Beach on May 02, 2016.

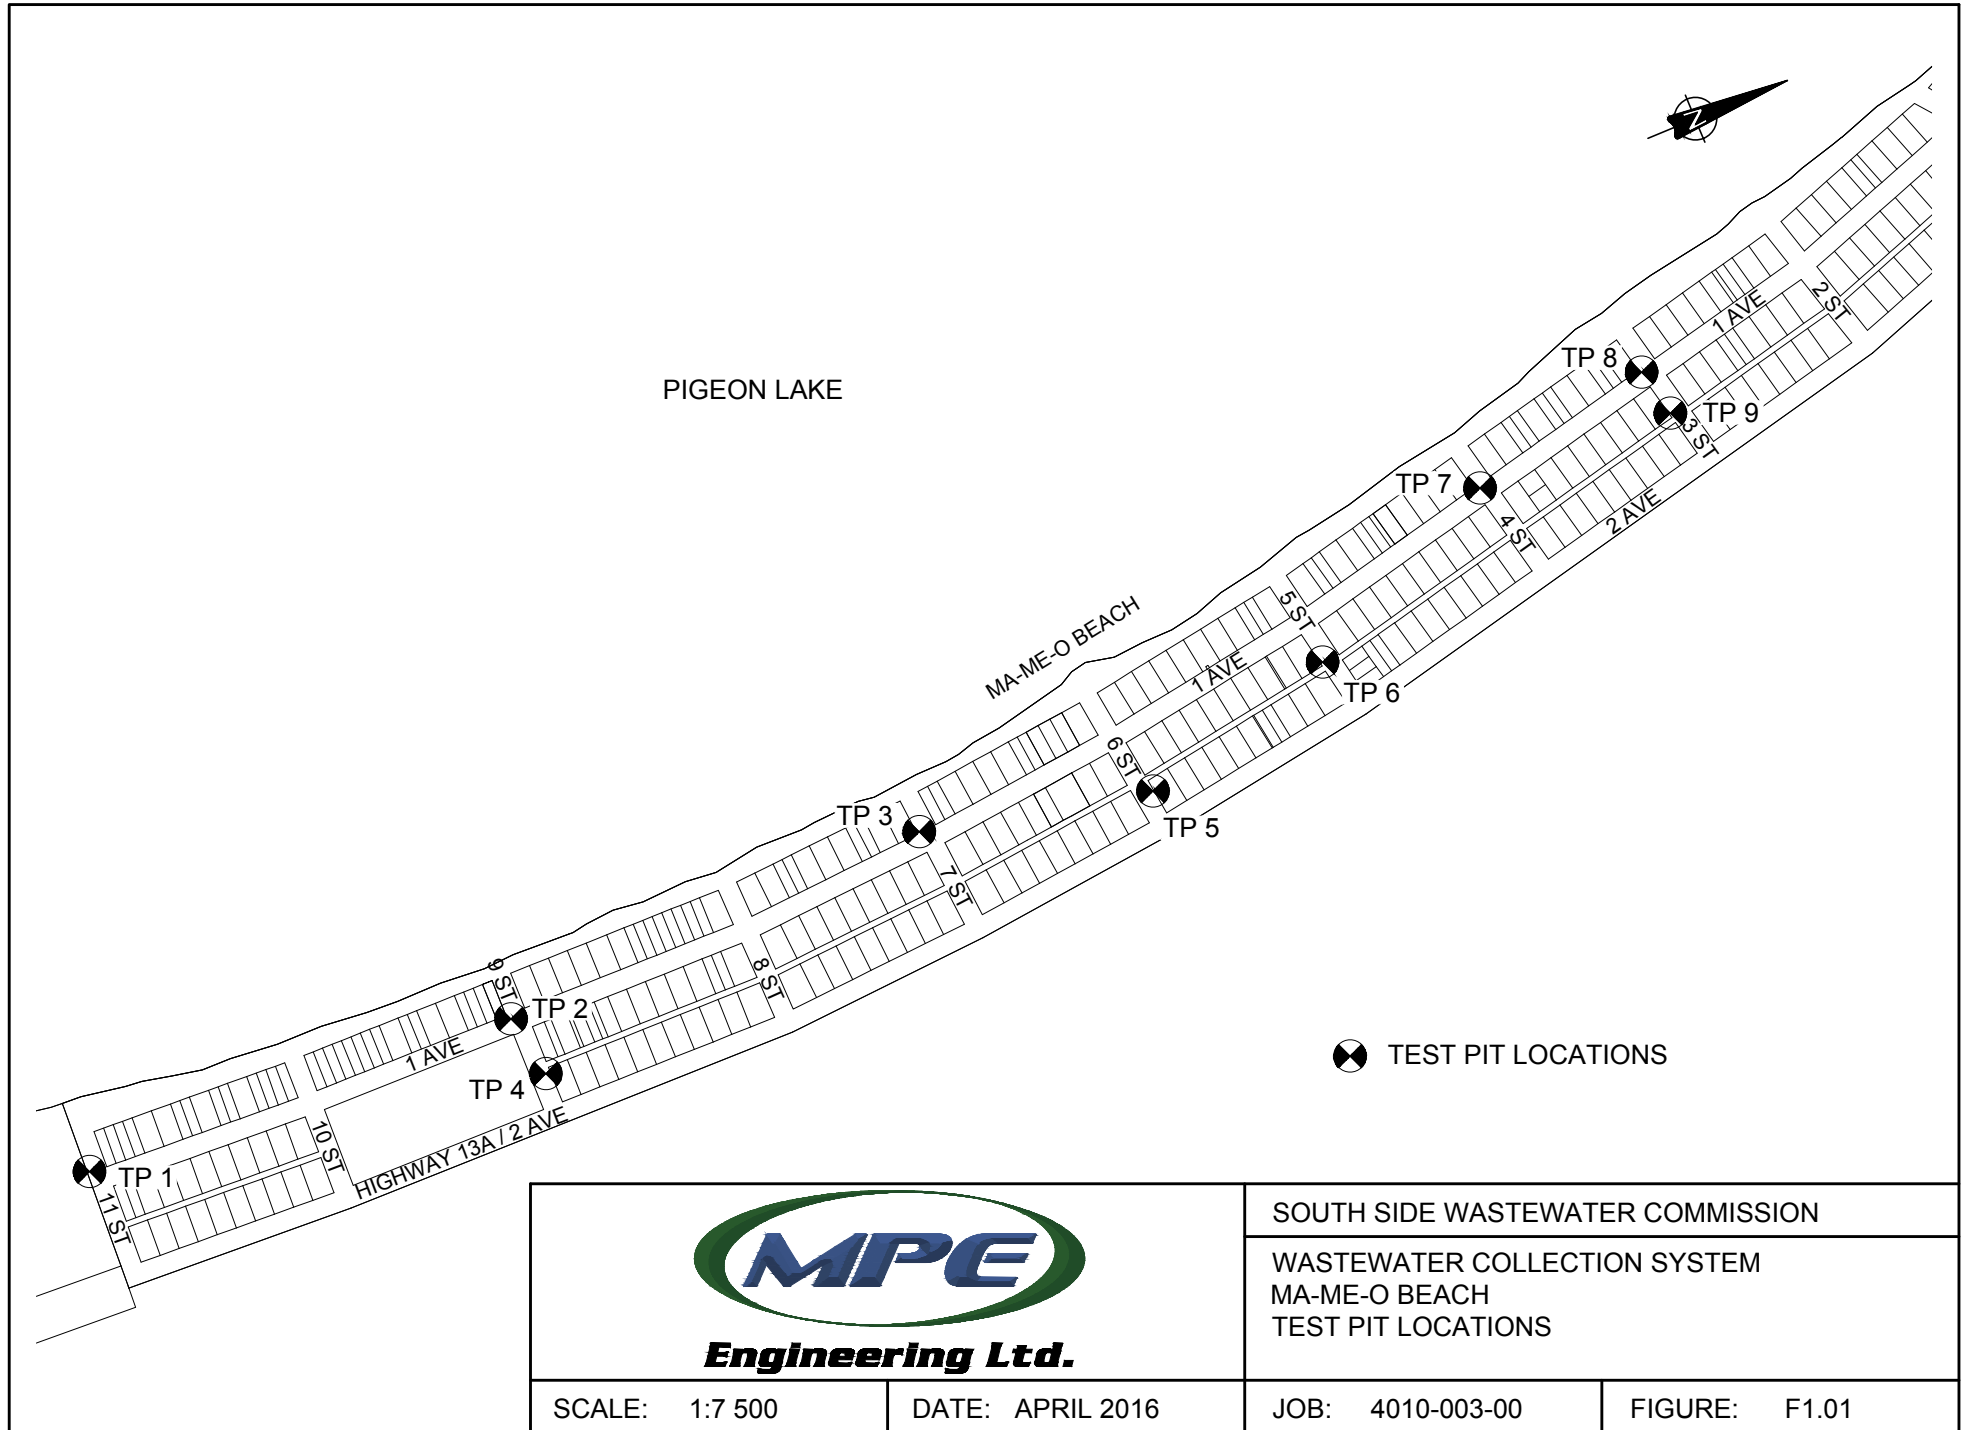

Test pitting will commence once utility locates have been completed. We anticipated the utilities will be located by May 02, 2016.

MPE Engineering and Cobra Property Developments Ltd. will be onsite completing the test pit excavation. Cobra will have a backhoe on site to excavate test pits off the side of the road in grassed areas. Soil from the excavation will be temporarily stored in the ditch and the test pit will be filled in by the end of the day.

Traffic will not be disturbed during the test pit excavation.

There will be nine test pits excavated in Ma-Me-O Beach, and one in Norris Beach. Refer to attached figures for test pit locations.

For any questions or concerns contact Gail at the Summer Villages Office.
