Information Technology Report

Upgrades/replacement for Libraries

We are currently configuring each Fortigate/Firewall a total of 47, then going to each of our libraries and replacing the Fortigate/Firewall. While we are at each library we will be installing Bitdefender (antivirus) on all the public computers for a total of 252 computers.

Please send in to NLLS HQ all public laptops to have Bitdefender installed.

Bitdefender

Our Anti-virus was pushed out to all the staff computers before the Christmas break. The roll out for the public computers is currently ongoing, with the initial call coming from Brandon to do some pre-setup and the finished product being installed when we are onsite.

Office 365

The migration to office 365 for our libraries is currently ongoing.

Site Visit

Site visits have been happening and will continue for the year as we no longer limit them to once a year.

Library Moves/Joining

Edgerton while having some growing pains is now fully moved into their new library

Labs

We currently have two labs available for loan. One lab of ten computers with windows7, Minecraft and office 2013; and one lab of six with windows 10 and office 2013. Please contact the IT department to book.
