

Board Meeting September 2017

Information Technology Report

Polaris

Polaris upgrade went forth as planned, most everyone upgraded successfully. We did have a few computers that were too old to handle the upgrade.

We are looking at upgrading Polaris again in November, the latest update will do a lot to make Leap more versatile.

Library Moves

Newbrook Library has its new building in place, we are just waiting on utilities to finish the move.

Internet and Supernet

We are looking into the cost of upgrading our internet bandwidth, this involves looking at pricing and options offered. In addition, to be able to handle the internet upgrade, we will be looking into the cost of upgrading our Supernet bandwidth.

Websites

We currently have a new template for the libraries and they are picking the finishing touches.

Computer Purchase

We just finished purchasing two lots of computers as per library requests, one lot had 19 computers and the other lot had 15. The last of these computers are being prepared to go to the requesting libraries.

New Technology

I.T. has recently bought a new technology that we will be showcasing during the NLLS Conference, please come by and take a look.
