Wastewater Update: March 2, 2018

Following the completion of the construction of the wastewater line through the Summer Villages of Grandview and Poplar Bay in 2017, we are now preparing for the next phase of our project. In the next few weeks, the bid package will be sent out to contractors for the service connections from the main line to individual residential tanks. As part of the bidding process, a pre-bid meeting will be held with the contractors. This meeting will also include a site visit with a tour of our summer villages to show the scope of the project and to provide general information concerning completion of the project. On March 21st, you may notice a convoy of trucks within the summer villages as we complete this part of the bidding process. No involvement is required by the residents at this time.

A preliminary timetable for this project is as follows: we are expecting the bid will be awarded in the middle of April and construction to start sometime thereafter at the discretion of the successful contractor. Work will start initially in Grandview and proceed northward into Poplar Bay. The completion of the project will be during 2019.

Further updates will be provided on the website as information becomes available. We are planning on having a public information meeting sometime in mid-April to provide detailed information on the project.

Thank you for your cooperation as we undertake this major project in our summer village.

Don Davidson
Mayor
