CONSTRUCTION NOTICE

June 4, 2018

Dear Resident,

As part of the Summer Village of Grandview Low Pressure Sewer Services project, underground sewer services on or near your street are scheduled to be installed. Construction is scheduled to begin 7th June 2018. This construction process will include excavation along the roadway that leads to your residence, as well as at your property line and at your holding tank location. You will be contacted prior to any work being done on your property by an Urban Dirtworks Employee to go over the details of what will need to be done in order to service your lot. Urban Dirtworks will make every reasonable effort to provide full time access to your residence during all hours of construction. Should access be limited, you will be made aware of it prior to construction beginning.

If you have small children, we ask that you please keep them at a safe distance from the construction zone and equipment. The construction crew on site will make an effort to protect your children from harm, however, they will need your assistance to constrain their natural curiosity.

Depending on weather, the hours of construction will be from 7am to 7pm Monday thru Friday and Saturday 7am to 6pm. In the rare case of an emergency situation, crews will work until the situation is resolved.

The contact and phone number for Urban Dirtworks is Mr. Cody Deschambault (Field Superintendent) 403-396-1062. In the rare event of an emergency, please call your local Town Public Works office.

Thank you for your patience during these interruptions.

Yours truly,

Urban Dirtworks Inc.
