

Regional Line Phase 2: Directional drilling has commenced along Hwy 13 from the Village at Pigeon Lake. The contractor is fusing the pipe and then will install it in the directionally drilled hole.

Grandview Wastewater:

The **Municipal Wastewater Utility Bylaw #338** has been passed by Council on July 13, 2018. This bylaw establishes the provisions of service by the Summer Village and also the requirements of the residents. The Service Connection Fee has been finalized at \$1250, (a further reduction from the previously discussed amount of \$1750) and the directional drilling cost of \$50/metre for distances over 10 metre. Council has also included the provision of a schedule of payment over 5 years of the Service Connection Fee if requested by the resident. A 2% per annum fee will apply if this option is selected. This bylaw will be posted on our website and all residents are encouraged to read it.

Phase 2 Status: All directional drilling has been completed in Grandview Heights and to the north end of Hamblin Park. Most two chamber tanks have been connected to the main line with the few remaining to be done after tank inspection has been completed. The construction train will continue over the coming week to lots past the entrance to Grandview Meadows. Residents are reminded to move all obstacles including trailers and ensure their gates are not locked.
