Aquality

September 2018

Today's Agenda

1. Introductions
2. Hot Topics
3. Issues and
Opportunities
4. Scenario Building
5. Intermunicipal Servicing

Presentation Outline

1. Project Background
2. IDPs
3. ICFs
4. Hierarchy of Plans
5. Existing Conditions
6. Past Work
 - North Pigeon Lake Area Structure Plan
 - Pigeon Lake Watershed Management Plan

PROJECT BACKGROUND

Goal

Establishing a shared vision for the future land use and servicing of the lands around the Summer Villages of Itaska, Sundance Beach and Golden Days and Leduc County.

Outcomes

Development of a joint Intermunicipal Development Plan

Development of three Intermunicipal Collaboration Frameworks

WORK PLAN

1

Project Initiation

- Staff interviews
- Consultation Plan
- Local Advisory Committee
- IDP area tour
- Policy Review

2

Context Study and Review

- Public Engagement Event 1
- Servicing Agreement Inventory/Analysis
- Joint Council Session #1
- LAC Review
- Public Engagement Event 2
- Engagement Summary

3

ICF and IDP Preparation

- Draft 1 (IDP and ICF)
- LAC review
- Draft 2 (IDP and ICF)
- Joint Council Session
- Final Drafts
- Engagement Events

4

Approval

- LAC meeting
- First Reading
- Public Hearing
- Second and third reading

What is an IDP?

IDPs are joint planning documents approved by a municipal Council to address the following:

- Future Land Use
- Intermunicipal Referrals
- Dispute Resolution

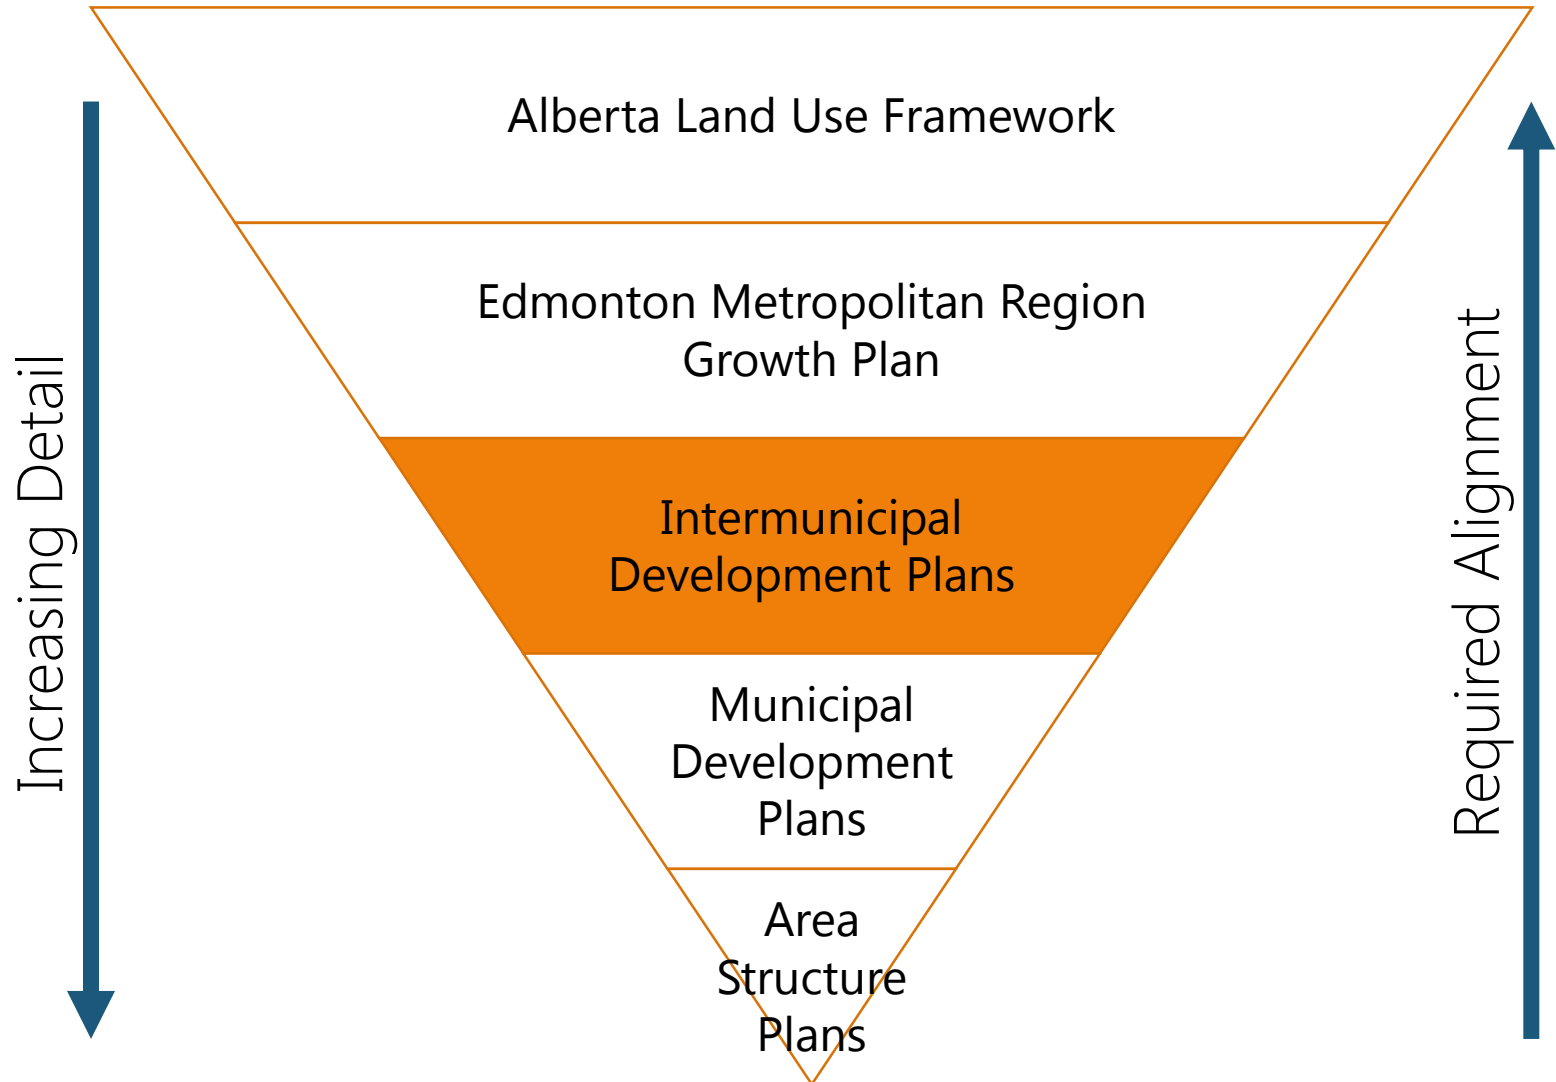

Recent changes to the Municipal Government Act require that all adjacent municipalities enter into IDPs together.

This is to facilitate joint planning of the lands along their shared boundaries.

This is different from an Municipal Development Plan.

MDPs guide future land use and infrastructure **within** a municipality.

Hierarchy of Plans

Existing Conditions - Communities

Sundance Beach, Itaska Beach, Golden Days and Leduc County Intermunicipal Development Plan

Sections Map

Legend

Boundaries

- Golden Days
- Itaska Beach
- Sundance Beach
- IDP Boundary
- Leduc County

Roads

- Local Roads
- Provincial Highways

Environmental Features

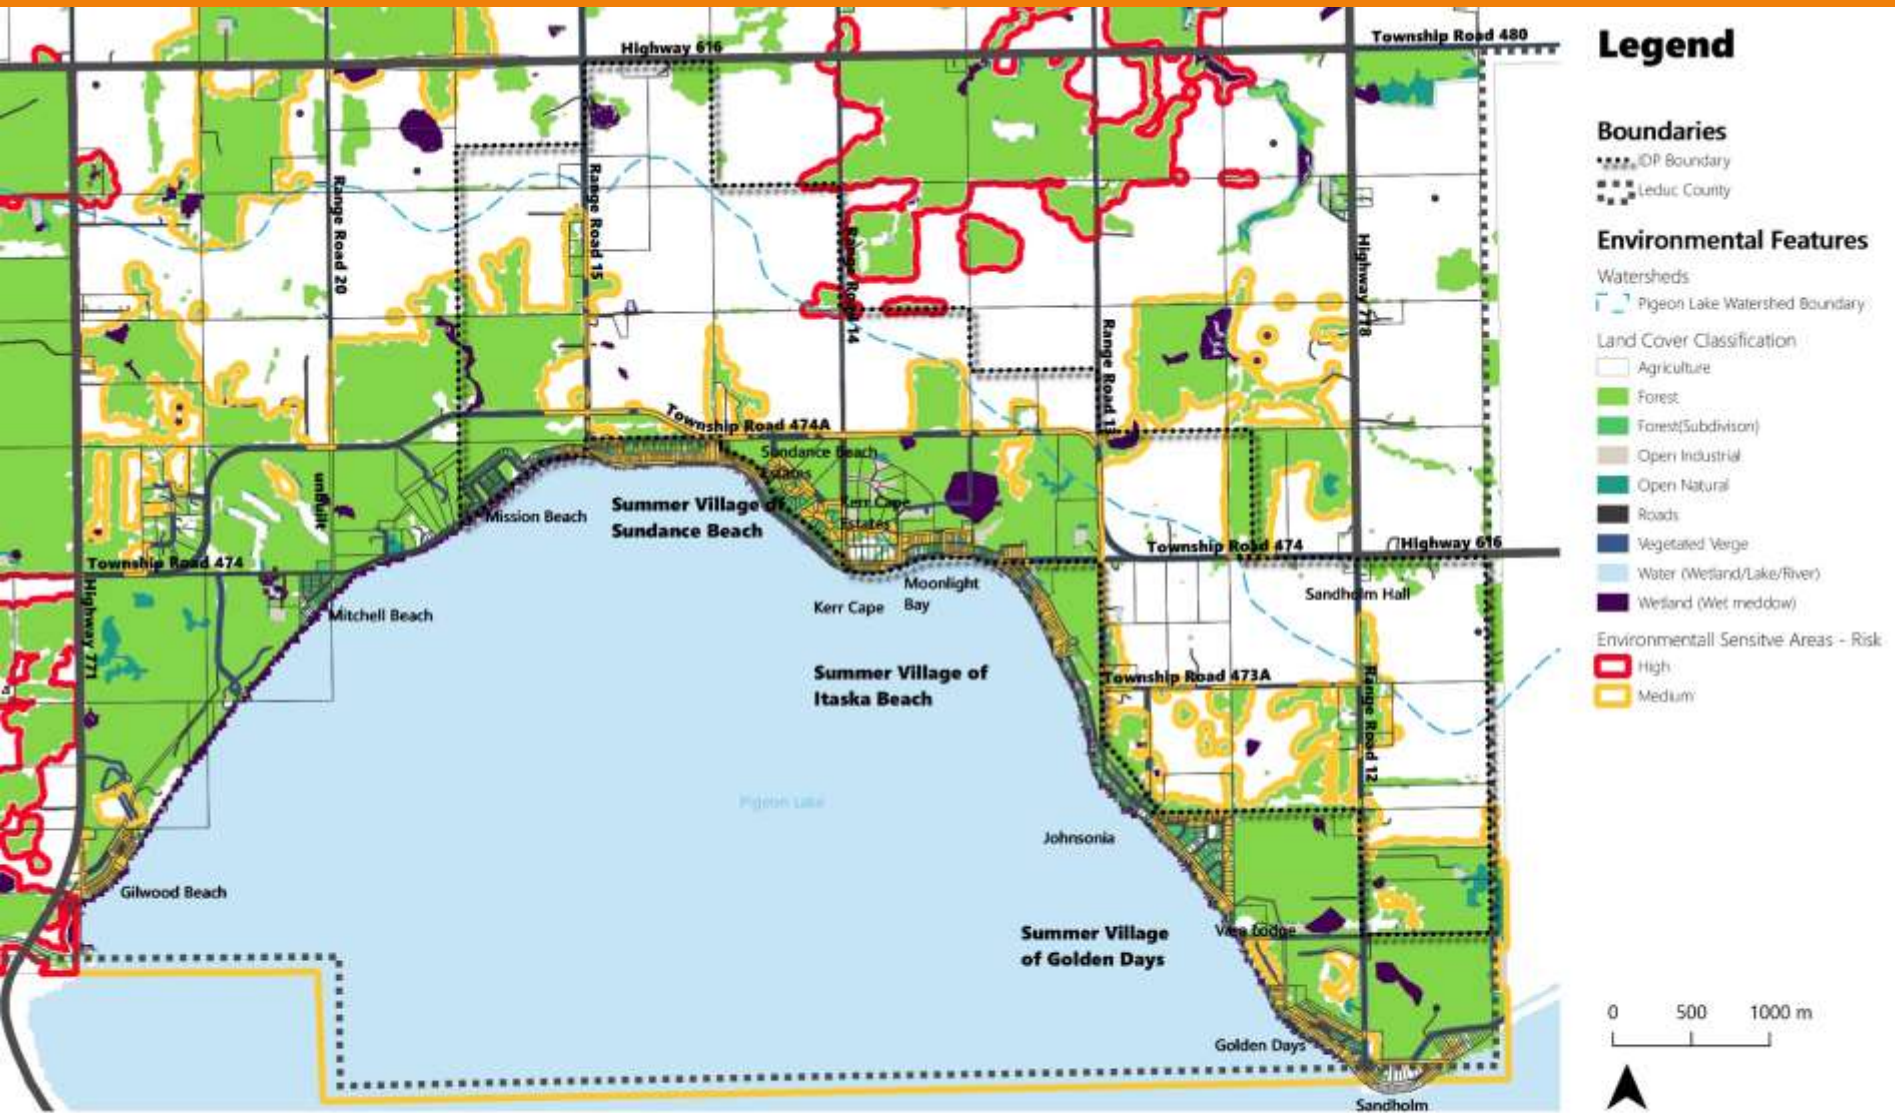

- Pigeon Lake Watershed Boundary

Existing Conditions – Transportation and Servicing

Existing Conditions – Environmental Features

Existing Conditions – Development Constraints

Existing Conditions – Existing Land Uses

Past Work – Pigeon Lake ASP

Legend

Boundaries

- Summer Villages
 - Golden Days
 - Itaska Beach
 - Sundance Beach
- IDP Boundary
- Leduc County
- Pigeon Lake Watershed Boundary

Golden Days MDP

- Developable Area
- Reserve

North Pigeon Lake ASP

- Cluster Subdivision
- Existing Development
- Lakeshore Conservation Area
- Preservation Area
- Resort Recreation Area

Existing Land Uses

- Summer Villages Land Uses
 - Direct Control
 - Park
 - Residential

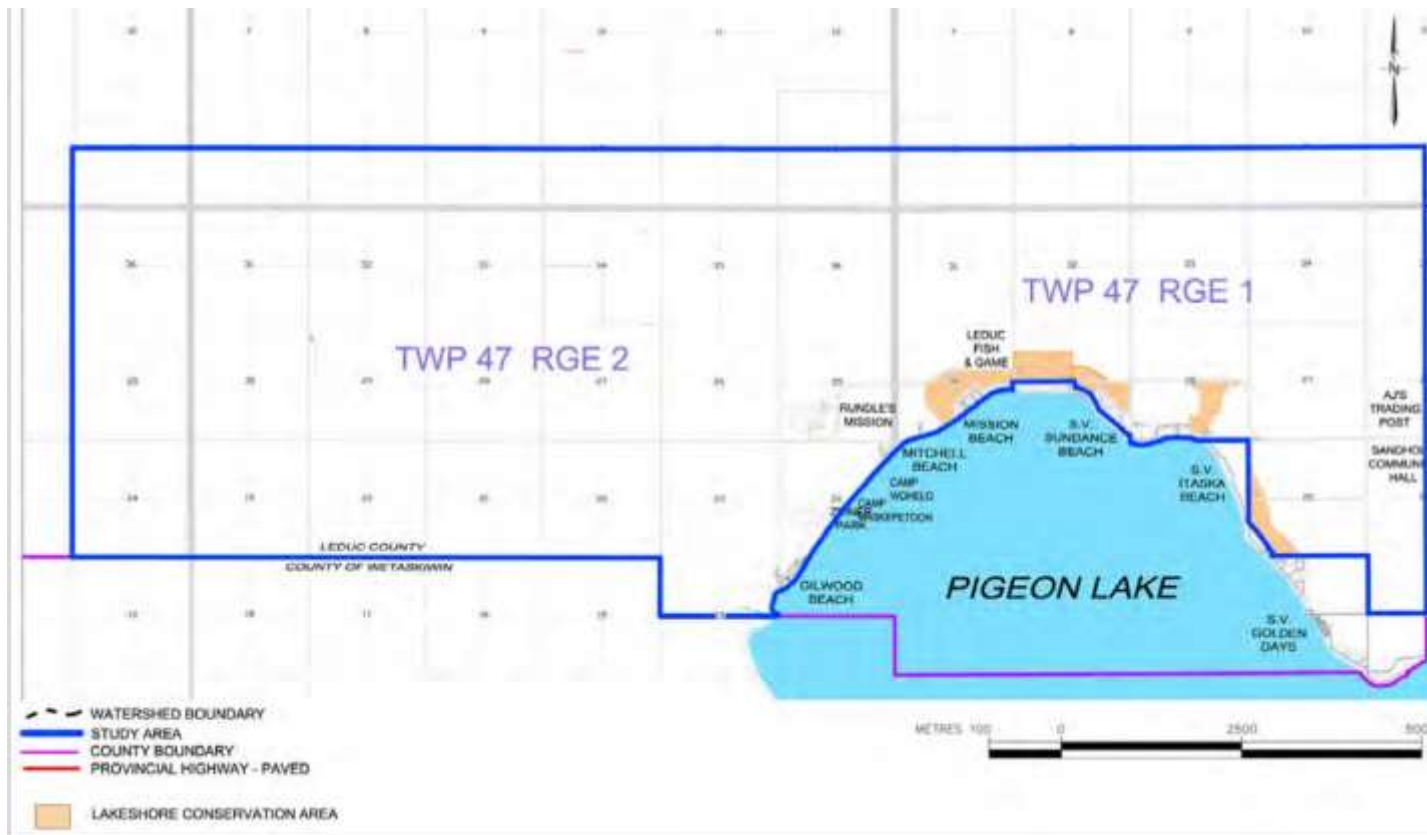

Past Work – Pigeon Lake ASP

Resort Recreation Area

- Maximum density of 3.8 units per acre
- All serviced with piped water and sewer
- Tree stand retention and wetland protection through a riparian setback analysis
- Requirements for publicly accessible day use areas

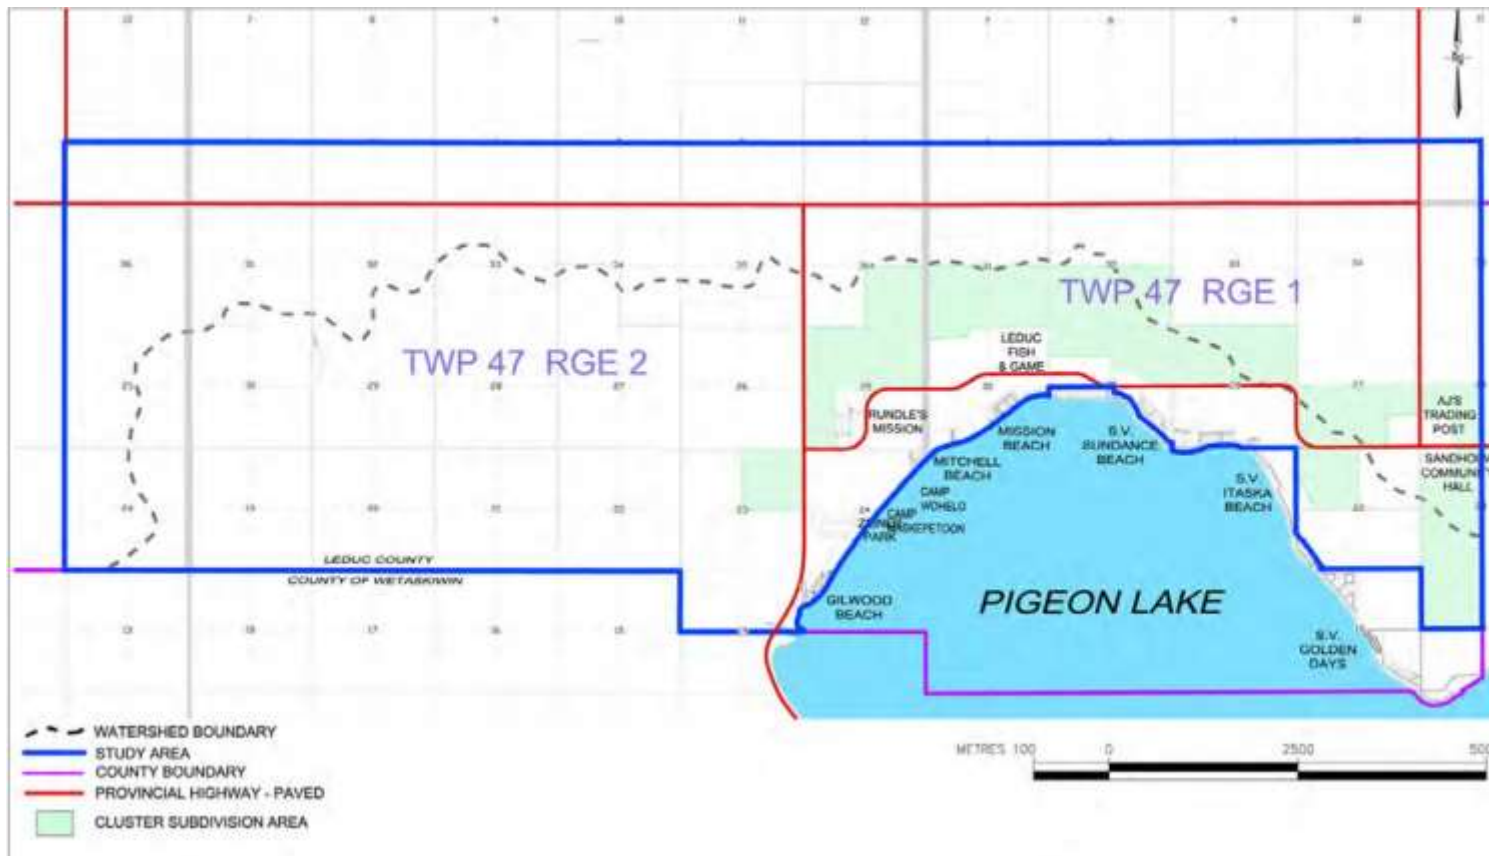

Past Work – Pigeon Lake ASP

Lakeshore Conservation Area

- 5+ acre residential lots
- 1 – 2 acre clustered-lots
- 9m natural area buffer from existing developments
- Re-naturalization requirements for subdivisions or larger developments

Past Work – Pigeon Lake ASP

Cluster Subdivision

- 40+ acre agricultural smallholdings lots
- 1 – 2 acre clustered-lots
- Up to 35 communally serviced cluster-lots per quarter section
- Up to 50 lots per quarter section if municipally serviced
- Restrictions on the development and subdivision of residual land

Past Work – Pigeon Lake Watershed Management Plan

Goals of the PLWMP

The 2018 Pigeon Lake Watershed Management Plan (PLWMP) is a non-statutory document intended to provide a coordinated, science-based strategy to protect and improve the quality of water in Pigeon Lake, its shore lands and its watershed. The plan has been supported by the many municipalities communities bordering Pigeon Lake. The Plan's goals include:

- Reducing the frequency and severity of algal blooms;
- Improving the health of the watershed and the lake; and
- Improving the recreational value of the land and economic health of the region.

Implementing the Pigeon Lake Watershed Management Plan

The plan is divided into four sections:

- The Watershed Lands;
- The Shoreline;
- The Lake; and
- Working Together.

These focus areas guide the 8 objectives of the plan including several that are important to consider for this level of intermunicipal planning. These include:

- Increase land cover types that have lower nutrient release rates, trap nutrients and promote biodiversity.
- Improve phosphorous management for all land use activities.
- Promote clean runoff practices.
- Protect groundwater that feeds into Pigeon Lake.

Improve regional collaboration.

Issues and Opportunities

- Discuss key issues within the intermunicipal areas
- Identify their geographic location using red dots
- Assign a number to each dot
- Explain the issue briefly on provided sheet
- Identify potential opportunities associated with identified issues

#	Issues	Opportunities

Scenario Development

- Review existing land use framework
- Develop future land use concept for the intermunicipal area that addresses your identified issues and opportunities
 - Country Residential (Large lots)
 - Resort Residential (Small lots)
 - Commercial
 - Environmentally sensitive areas
 - Institutional
 - Open space and trails network
 - Agriculture
 - Other
- Summarize key aspects of your land use vision
