

Scrabble board should print to 34x31"

Each letter is its own letter size sheet.

Print the letters on glossy paper for better wear or cheap recycle paper to keep costs down

Buy a full sheet of self-adhesive foam board from staples and stick the full page letters to the adhesive side

Go to a graphics shop and ask for magnetic scraps and then use double sided tape to add magnetic backs

If you don't have a graphics shop nearby, cheapest option is likely [uline.ca](http://uline.ca)

I use a piece of galvanized steel with a safety edge added as the letter holder, but you can use anything magnetic like a small whiteboard.

OR don't make it at all and just ask me to send it to you on van run.
