

# NLLS REPORT

## What's new in IT

- We have purchased new Wireless Access Points for our libraries, they will be going out in the new year.
- November will be the final quarterly purchase for 2018
- We are currently looking into new fortiswitches to replace the HP switches at Headquarters.
- Another software we are looking into is called 'You can Book Me' it is a calendar that shows our available dates. We are looking into allowing librarians to quickly and easily look at our available times for scheduling site visits. This would work for public services, for scheduling author dates as well.
