

STAGE 2: FORWARD FACING

- Once forward facing, best practice is to remain harnessed to the limits of the seat, and until at least 40lbs and developmentally ready to move to a booster
- Harness at or ABOVE shoulder level
- Outgrown when the child approaches the height or weight limit of the seat, OR the tops of the ears are level with the top of the hard shell, OR when the top position of the harness is no longer at or above the shoulder level (consult your manual for specifics)
- Top tether attached to an approved anchor point in the vehicle
