NOTIFICATION OF WASTEWATER SYSTEM SHUT DOWN

At the Council meeting of December 12, 2019 Council reviewed information provided by MPE Engineering with respect to the progress of the heat tracing repairs.

MPE has advised Council that the heat tracing repairs will not be completed this year.

Council has decided that rather than wait and risk system freezing, they will have the entire system shut down and winterized the week of January 6th. THS Septic and Civil Solutions has been contracted to perform this work for the Summer Village.

During the shutdown period, expected to last from January 6th to April 15th, 2020, you will be required to have your holding tank pumped out. Invoices for the pump outs may be submitted to the Summer Village Office for reimbursement.

The Summer Village and the engineering firm are continuing to work with the contractor to ensure that the repairs are completed to the required specifications. The costs associated with the remediation of the heat tracing repairs are included under the existing contract.

We apologize for the inconvenience.
