

Automated Residential Waste Carts

Coming to Millet in March

What is automated waste cart collection?

Automated waste cart collection is a system where a specially-designed truck picks up the waste cart, empties it, and then returns it to its original position.

Why switch to an automated cart system?

Automated rolling waste carts relieve residents of the need to move heavy cans and bags, while keeping animals out of refuse and preventing wind blown debris. Be sure to bag all loose and light materials before placing in the waste cart. The carts are supplied free of charge by Ever Green Ecological Services. While providing a cleaner community with less litter, the waste cart system also improves efficiency and protects workers from injury and the potential of handling dangerous garbage.

When will I get a waste cart?

New waste carts will be delivered to homes during March. If you have not received your carts by the end of March, please call Ever Green Ecological @ 780-417-2282.

What if I lose or damage my waste cart?

Please be aware that the carts are the property of Ever Green Ecological Services and residents are responsible for lost, stolen, or damaged carts. If your cart requires repair, please call Ever Green Ecological Services at 780-417-2282.

What happens to the waste cart when I move?

Waste carts should remain at your current property, and should not be moved. If you move, the cart should be emptied, cleaned and left at the original residence. Ensure it is in a secure location, such as a garage or shed.

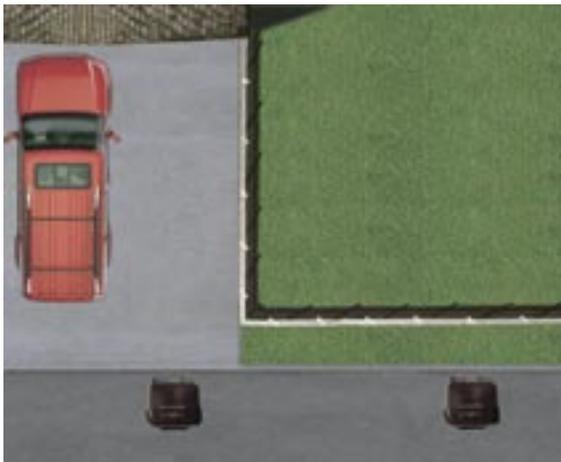

Placing Your Cart at the Curb:

Front Street (by 7 AM)

1. Handles to the sidewalk.
2. 1 M (4 ft.) around all carts, including overhead.

Back Alley (by 7 AM)

1. Handles to the edge of alley
2. 1 M (4 ft.) around all carts, including overhead.

When do I start using my waste carts?

Starting Friday March 30th, the waste carts will be collected on Fridays. Blue bags will continue to be collected every second Monday.

Can I use my existing garbage cart or can?

No, because only new rolling waste carts are compatible with the automated collection trucks. As of April 1, only the new waste carts should be used.

What if vehicles, trees or poles interfere with cart pickup?

Residents who experience difficulty with cart placement on collection day should contact the Town Office. Proper cart placement is essential for efficiency of the automated collection system.

Can I place garbage beside the cart for pickup?

Only garbage contained within the cart will be collected. Carts must close properly. Please remember to reduce waste by using the blue bag recycling program.

What can go in the waste cart?

Waste carts are for waste only. Do not include hazardous materials or electronics. Do not attempt to stuff large items in the cart.
