

# Setting Up ChatterEmail™

## Setting Up ChatterEmail on Your Treo for the First Time

If you have not loaded ChatterEmail on your Treo, do the following in order to load the software on your Treo for a free 30 day trial.

1. Go to your Treo's built in browser.
2. Type [get.chatteremail.com](http://get.chatteremail.com) in the URL section.
3. Accept the Palm installer application into applications.
4. Select [Save and Open](#) and do not change the location of the ChatterEmail download.
5. Select Run.
6. Ignore the Free IMAP account offer (You already have an IMAP account at Webmail.us)
7. Tap under [Choose the account type](#).
8. In the drop-down menu and select [Webmail.us](#).
9. In the [Username](#) box, enter your entire email address (e.g., [myname@mydomain.com](#)), using all lowercase letters.
10. Tap the [OK](#) button.

Your Treo is now setup for Push Email with your Webmail.us account

## Setting Up a Mail Account if ChatterEmail is already loaded on your device

1. Tap the [Menu](#) button to activate the main menu.
2. Select [New Account](#) from the box menu.
3. Tap under [Choose the account type](#).
4. In the drop-down menu and select [Webmail.us](#).
5. In the [Username](#) box, enter your entire email address (e.g., [myname@mydomain.com](#)), using all lowercase letters.
6. Tap the [OK](#) button.

Your Treo is now setup for Push Email with your Webmail.us account

## Assigning SSL Secure Server Settings

After setting up your mail account, you can follow the steps below to adjust your account settings to use the secure (SSL) server. The SSL protocol allows you to send and receive secure email messages.

1. Tap the [Menu](#) button to activate the main menu.
2. Select [Edit Mailbox](#).
3. In the [Imap Server](#) box, enter the secure email server name: [secure.emailsrvr.com](#)
4. Tap the [Deliver](#) tab
5. Place a check next to [Use SSL](#)
6. Tap the [SMTP](#) tab
7. In the [Server](#) box, enter the secure email server name: [secure.emailsrvr.com](#)
8. On the bottom of the screen select [SSL](#)
9. Tap the [OK](#) button.
